

# LETS GO DELIVERIES LOGO DESIGN

LETS GO MATE

This is the first logo that the company asked us to design it for them. But with time, they decided to bring out two more companies but with the same first names but different work profiles. After making an ecofriendly travel solution, they also came with an idea of making a repairs and home delivery providing companies.

**LetsGoFix**

When a company decides to make different companies under same thought and identity, the challenge in the designing process begins. Thus, we made sure that all the three logos fit into the same theme, color and the conceptualisation.

**LET'S GO  
DELIVERIES**

Came up with simple and minimal designs of the logos considering their individual meanings and representation and the client appreciates the uniqueness in each alongwith the uniformity as one.
